

 dias.works

DIAS Works is an honest attempt to build world class products while sustaining our clients with meaningful solutions. It was born out of one single idea, “the idea of a solution driven by clients needs rather than a solution driven by the providers interests”.

A Joint Venture company between two established entities DWI.agency and EAAS Works, DIAS Works has already managed to dole out some very meaningful solutions for the clients problems. We take a lot of pride in “solutions” and that’s one thing our clients love us for.

Some of our solutions in government sector have not only been adopted heavily and respected equally by users and reviewers, but also have won us awards at a national level for being ruthlessly meaningful and clear.

Our Vision

DIAS Works will strive to be an ecosystem of Design and Technology solutions which are honest, meaningful, scalable and affordable. DIAS Works will continue to stay in consulting domain with primary focus in Design and Technology.

ABOUT DWI

DWI is a TECH.UX company with its primary focus on digital transformation of companies. It has a sole purpose of “idea to sale”. Most organisations treat creative capability and the customer acquisition separately, and with advent of digital media and media neutral ideas, the lines have dimmed. The post Corona world is going to be a leaner world. A world that needs to get its priorities right. DWI with its unique positioning of IDEA TO SALE has helped many clients achieve this feat. We surprised ourselves with some of the works like INK@WASH startup platform which will remain a super high point of our work for many years to come especially because of the category of industry.

Our promoters also have an enormous experience in converting many ideas to sale over the past 20+ years.

Promoting innovations in Water, Sanitation & Hygiene (WASH) to support the achievement of the Sustainable Development Goals

Telangana, the youngest state of India, has rapidly emerged as the innovation capital of India. It has successfully built vibrant innovation ecosystems in various sectors and established T-Hub, Telangana State Innovation Cell (TSIC), T-Works, RICH, We-Hub and WIH-Hub etc.,

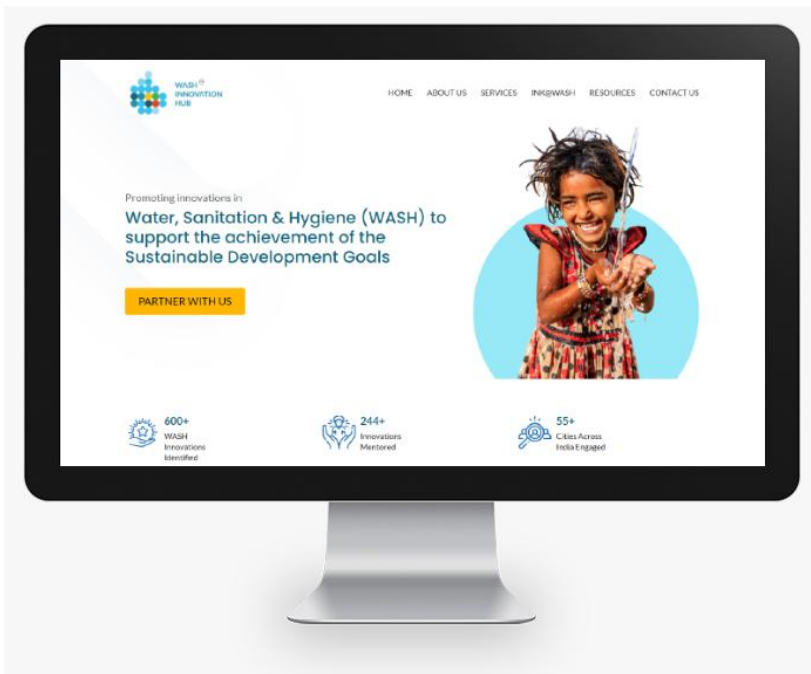

Government of Telangana (GoTS) has prioritized Water Sanitation and Hygiene (WASH) and is deeply committed to achieving the Sustainable Development Goal (SDG) targets well ahead of the globally agreed timelines. In line with this commitment, the Municipal Administration and Urban Development Department (MA&UD), GoTS is pleased to announce the establishment of the WASH Innovation Hub (WIH), a game changing initiative to promote innovations in water, sanitation, and hygiene sectors for India. This is in partnership with Administrative Staff College of India (ASCI).

WEBSITE SNIPPET

“The WIH is an ecosystem to continuously identify and develop innovative WASH solutions and building the capacities of municipalities and other stakeholders for implementing and sustaining these solutions.”

It is currently working with over **600 start-ups and innovators** to creatively solve problems confronting our cities and local bodies, on a mission mode.

As part of our efforts with Wash Innovation Hub, we made a comprehensive visit to Dehradun to identify issues in WASH Sector and how Government of Uttarakhand can be solving them using Wash Innovation Hub support. This whole exercise was facilitated by **Lt. Gen. Gurmit Singh, PVSM, UYSM, AVSM, VSM (Retd.)** GOVERNOR OF UTTARAKHAND

उत्तराखंड में लागू होगा तेलंगाना मॉडल 'वाश'

हैदराबाद से आई टीम उत्तराखंड में तलाश रही है संभावना, राज्यपाल से की मुलाकात

देहरादून, 29 सितम्बर (ब्यूरो): एडमिनिस्ट्रेटिव स्ट्राफ कॉलेज ऑफ इंडिया, हैदराबाद से आई टीम ने राज्यपाल गुरमीत सिंह से मुलाकात की। इस दौरान टीम के सदस्यों ने जल स्वच्छता और स्वच्छता में नवाचार कार्यक्रम 'वाश' (वाटर, सैनिटेशन, हाइजीन) के सम्बन्ध में अभी तक किये गये कार्यों की जानकारी दी। राज्यपाल को बताया गया कि उत्तराखंड में भी इस मॉडल को लागू करने का विचार है और इस संबंध में प्रदेश के शीर्ष निकायों से चर्चा चल रही है।

'वाश' तेलंगाना सरकार के नगर प्रशासन और शहरी विकास, द्वारा स्टार्टअप/इनोवेटर्स, अकादमिक संस्थानों, गैर-लाभकारी संस्थाओं के बीच सहयोग और साझेदारी के लिए स्थापित किया गया है। 2019 में लॉन्च किये गये 'वाश' ने कई गतिविधियों का संचालन किया है। वर्तमान में यह

स्वच्छता और अपशिष्ट प्रबंधन के क्षेत्र में उत्तराखंड के सहयोगी संस्था के रूप में कार्य किये जाने की प्रक्रिया में है।

निदेशक (विद्युत) विनोद अर्चता और साई किरन के नेतृत्व में उत्तराखंड आई टीम ने राज्यपाल को बताया कि उत्तराखंड में सतत विकास हासिल करने के लिए 'वाश' क्षेत्र में नवाचार समय की जरूरत

है। उन्होंने राज्यपाल को बताया कि पिछले दिनों शासन के उच्चाधिकारियों से उनकी मुलाकात हुई और कई स्थानों का भ्रमण भी किया। उन्होंने अपर मुख्य सचिव आनंद वर्धन, सचिव निवेश झा, और अपर सचिव सचिन बंसल से मुलाकात कर इस प्रोजेक्ट के लिए उनके सकारात्मक सहयोग की सराहना की और जल्द ही इसे उत्तराखंड में लागू करने की बात कही।

राज्यपाल ने कहा कि इस तरह के नवाचार उत्तराखंड के लिए बेहद उपयोगी रहेंगे। उन्होंने कहा कि हमारे सामने जल स्वच्छता, प्लास्टिक और ठोस अपशिष्ट प्रबंधन चुनौती के रूप में है जिससे सार्वजनिक स्वास्थ्य और पर्यावरण को भी नुकसान हो रहा है। राज्यपाल ने कहा कि चारधाम यात्रा मार्गों में 'वाश' के अभिनव टॉयलेट मॉडल को लागू किया जा सकता है।

The idea of INK@WASH was conceived in August 2019 and as a startup branding and digital company we had taken over the first version of INK@WASH talks in 2020 January under the leadership of Prof Srinivas Chary and Dr Malini Reddy. It was taken up on a project mode and we all poured our heart into the most ignored sector, the WASH (Water, Sanitation and Hygiene). It was also new to me but very exciting to learn. As a guest faculty at ASCI I had spent over 8 years teaching on and off on various subjects, again as a passion but this project was a beautiful amalgamation of theory to practice with clear measurable outcomes.

INK@WASH 1.0 was a roaring success and our Hon'ble Minister for IT and MA&UD K T Rama Rao announced S-Hub with a corpus of 25 crores.

Corona happened but the spirit never died, INKWASH2.0 happened online with the same passion and we sustained the momentum with the Plastic Recycling sector. Countless meetings, Endless Perseverance of the multi functional teams, students, volunteers, professors, vendors, suppliers and many more partners and startups poured in like a tsunami. A controlled Tsunami that was so efficiently managed by a passionate connected team.

Cut to yesterday with over 110+ MoUs signed and multiple new ideas, Hon'ble Minister made a commitment that "Telangana will be their first customer" and that said it all.

The INK@WASH event is now a property safely being guarded by WASH INNOVATION HUB - a proud property of ASCI and GoTS.

DIAS Works (dias.works) is proud to have received the coveted WASH Stewardship award for Digital, Brand and IT support from none other than Hon'ble Minister for MA&UD and IT, Mr K T Rama Rao and we thank the professional guidance and immense support lent to us by Dr. Y. Malini Reddy and Prof Srinivas Chary.

PATTANA PRAGATHI TOILET MONITORING SYSTEM. (MOBILE APP AND WEB DEVELOPMENT FOR GOVT OF TELANGANA).

Telangana Govt. under the leadership of Hon'ble Minister for IT and MA.UD Mr. K Taraka Rama Rao was looking for a mobile and web application for its recently expanded municipal division. With over 150 new municipalities, the legacy monitoring systems were not enough to monitor the rapid investment and expansion into the urban planning division with over 10000 toilets planned in the year 2020 itself and the T.S govt looking for OPEN DEFECATION FREE ++ Status from Swacch Bharat Guidelines. This application was quite a challenge. While it had to be very simple for telugu medium and ground level workers to use, it also had to manage the complex data mechanisms to manage multiple variables of the Planned, Under construction and Functional toilets and basically make sure that the simplicity of usage brings in the Good Behavior of maintaining the toilets at-least twice in a week and report the same in real-time.

Sanitation /Public Toilet Mobile Application:-A Mobile Application with Dashboard and Server space for image uploads and a web application to manage the backend for CDMA. 5k toilets are constructed, and another 5k - 6k is to be completed by Oct 2nd, 2020. There were two phases in the Application development. In Phase I - Basic details, features and photos (newly constructed toilets) to be uploaded by the ULB's or Sanitary Inspectors. Numbers of Users of the App are based on the total number of towns in Telangana State. Sanitary inspector should review every week, the toilets in his/her locality need to be updated by answering questions and uploading photos

TATA Trusts came with research project – ‘A pilot study to develop an efficacious oral cancer screening strategy for India’, in collaboration with National Cancer Institute (NCI), King’s College London, and Centre for Cancer Epidemiology (CCE).

The study will develop a risk prediction model for oral cancers a 3-step screening strategy for early detection of oral cancer. The screening program by capturing data and screening of 15000 tobacco users in the age group of 30-65 years for a period of one year. The screening model is largely community based screening camps organised in the Kamrup district of Assam. Positive cases to be referred to Dr. B. Borooah Cancer Institute, Guwahati, Assam. DWI helped with ANDROID MOBILE application for the complete multi camp online screening of the patients with multiple dashboard views and reporting formats.

TATA TRUSTS

TATA TRUSTS

DWI worked with TATA Trusts, Tata Memorial Hospital and associated field staff to develop two cancer screening applications.

- For Mumbai police, a cancer screen application for Non-communicable diseases, Oral, Breast, Cervix cancer.
- For Public Health in Assam for Oral Cancer Screening.

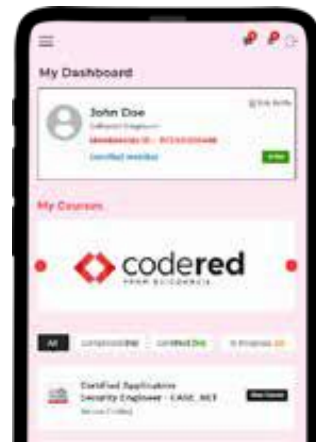

With extensive reporting, live dashboards. Field level screening and real time data, the time to analyze data for multiple partners was drastically reduced.

EC-Council

Hackers are here. Where are you?

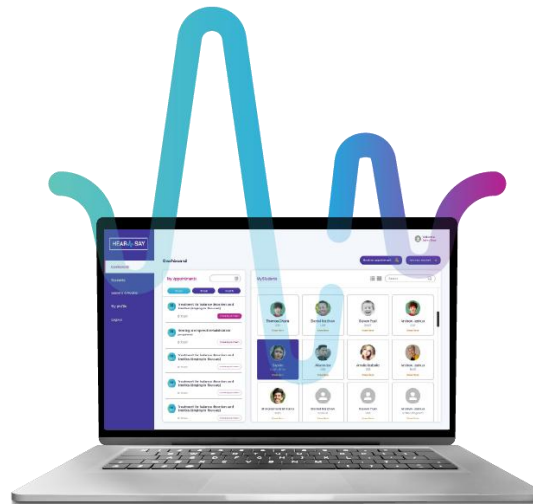

EC-Council Membership Build Cybersecurity skills without Limits

Cybersecurity Professionals are only as successful as their skills are updated. With access to CISOs co-authored programs and content, skill assessments and analytics, EC-Councils membership gives you the most effective path to building business-critical skills.

Calibrate your sound levels

Hearsay is an attempt to bridge the gap between the audiologists and their clients in the new normal of Home Based sessions. There has been an enormous shift in the way clients are attending their classes and while regular video conferencing software's are good for normal people; for hearing impaired there are other tools and settings required that is eating into the time of the audiologists. And this is the main purpose of this software to reduce the time taken by audiologist to set the calibration of sound levels and that too remotely. There are some simple solutions that have been implemented to suit this new method of reaching out to clients and it has been best suited for the audiologists and clients in person meeting collaborative methods. Most of the such interactive collaborations, we have tried to automate successfully.

The place to find a certified dermatologist and reach safe hands

Truederm is an attempt to provide the patients with a list of dermatologists, certified by TS-IADVL . It's a genuine attempt to differentiate between true dermatologists and non-accredited service providers.

- Search your dermatologist by location/name in Telangana state
- Genuine list of service provider members of TS-IADVL

THANK YOU
